

SARS-CoV-2 Extraction Validated

- Can be used DRY or with Viral Transport Media Solution
- Improved DNA & RNA absorption and extraction for bacteria, fungi & viruses

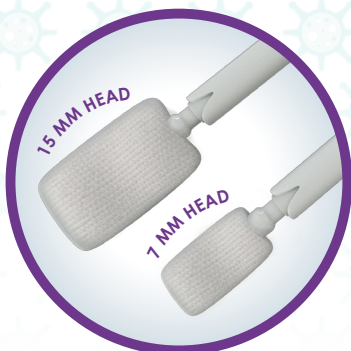

PROPRIETARY,
EVIDENCE-
BASED DESIGN

SUPERIOR
ABSORPTION
& EXTRACTION

UNIQUE, POLYESTER DOUBLE-
LAYER, WOVEN FABRIC PICKS UP
& RELEASES MICROBIAL DNA/RNA

RIGID DEVICE CONSTRUCT
WITH NO-TOUCH
RELEASE MECHANISM

Improved microbiological
yield and cycle threshold
in molecular testing in
standardized experiments
vs. other swabs

Tested per the CLSI
standard for culture

Suitable for sampling in all
healthcare & surgical
environments – patient samples,
equipment, surfaces

Optimized for collection
of biofilm & organisms in
implant-related infection

Gamma Irradiated,
user-friendly device;
minimizes environmental
contamination

Efficient laboratory
transfer for multiple
testing applications
